

# Hospital Equity Measures Report

## General Information

Report Type: Hospital Equity Measures Report  
Year: 2024  
System Name: Community Memorial Healthcare  
Principal Hospital Type: General Acute Care Hospital  
Associated Hospitals:

Facility Name	Facility Type	HCAI ID	Address
COMMUNITY MEMORIAL HOSPITAL-SAN BUENAVENTURA	General Acute Care Hospital	106560473	147 N. BRENT STREET, VENTURA, CA 93003
COMMUNITY MEMORIAL HOSPITAL - OJAI	General Acute Care Hospital	106560501	1306 MARICOPA HIGHWAY, OJAI, CA 93023

Status: Submitted  
Due Date: 11/29/2025  
Last Updated: 11/21/2025  
Hospital Web Address for Equity Report: <https://www.mycmh.org/community-health/>

## Overview

Assembly Bill No. 1204 requires the Department of Health Care Access and Information (HCAI) to develop and administer a Hospital Equity Measures Reporting Program to collect and post summaries of key hospital performance and patient outcome data regarding sociodemographic information, including but not limited to age, sex, race/ethnicity, payor type, language, disability status, and sexual orientation and gender identity.

Hospitals (general acute, children's, and acute psychiatric) and hospital systems are required to annually submit their reports to HCAI. These reports contain summaries of each measure, the top 10 disparities, and the equity plans to address the identified disparities. HCAI is required to maintain a link on the HCAI website that provides access to the content of hospital equity measures reports and equity plans to the public. All submitted hospitals are required to post their reports on their websites, as well.

## Laws and Regulations

For more information on Assembly Bill No. 1204, please visit the following link by copying and pasting the URL into your web browser:

[https://leginfo.ca.gov/faces/billTextClient.xhtml?bill\\_id=202120220AB1204](https://leginfo.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB1204)

## Hospital Equity Measures

### Joint Commission Accreditation

General acute care hospitals are required to report three structural measures based on the Commission Accreditation's Health Care Disparities Reduction and Patient-Centered Communication

Accreditation Standards. For more information on these measures, please visit the following link by copying and pasting the URL into your web browser:  
<https://www.jointcommission.org/standards/r3-report/r3-report-issue-36-new-requirements-to-reduce-health-care-disparities/>

The first two structural measures are scored as "yes" or "no"; the third structural measure comprises the percentages of patients by five categories of preferred languages spoken, in addition to one other/unknown language category.

Designate an individual to lead hospital health equity activities (Y = Yes, N = No).

N

Provide documentation of policy prohibiting discrimination (Y = Yes, N = No).

Y

Number of patients that were asked their preferred language, five defined categories and one other/unknown languages category.

96244

Table 1. Summary of preferred languages reported by patients.

Languages	Number of patients who report preferring language	Total number of patients	Percentage of total patients who report preferring language (%)
English Language	84742	96244	88
Spanish Language	11202	96244	11.6
Asian Pacific Islander Languages	91	96244	0.1
Middle Eastern Languages	94	96244	0.1
American Sign Language		96244	
Other Languages	115	96244	0.1

### Centers for Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH)

General acute care hospitals are required to report on rates of screenings and intervention rates among patients above 18 years old for five health related social needs (HRSN), which are food insecurity, housing instability, transportation problems, utility difficulties, and interpersonal safety. These rates are reported separately as being screened as positive for any of the five HRSNs, positive for each individual HRSN, and the intervention rate for each positively screened HRSN. For more information on the CMS SDOH, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cms.gov/priorities/innovation/key-concepts/social-drivers-health-and-health-related-social-needs>

Number of patients admitted to an inpatient hospital stay who are 18 years or older on the date of admission and are screened for all of the five HRSN

NA

Total number of patients who are admitted to a hospital inpatient stay and who are 18 years or older on the date of admission

NA

Rate of patients admitted for an inpatient hospital stay who are 18 years or older on the date of

admission, were screened for an HRSN, and who screened positive for one or more of the HRSNs  
 NA

Table 2. Positive screening rates and intervention rates for the five Health Related Social Needs of the Centers of Medicare & Medicaid Services (CMS) Social Drivers of Health (SDOH).

Social Driver of Health	Number of positive screenings	Rate of positive screenings (%)	Number of positive screenings who received intervention	Rate of positive screenings who received intervention (%)
Food Insecurity				
Housing Instability				
Transportation Problems				
Utility Difficulties				
Interpersonal Safety				

### Core Quality Measures for General Acute Care Hospitals

There are two quality measures from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey. For more information on the HCAHPS survey, please visit the following link by copying and pasting the URL into your web browser:  
<https://hcahpsonline.org/en/survey-instruments/>

### Patient Recommends Hospital

The first HCAHPS quality measure is the percentage of patients who would recommend the hospital to friends and family. For this measure, general acute care hospitals provide the percentage of patient respondents who responded "probably yes" or "definitely yes" to whether they would recommend the hospital, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for the percentages. The percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 19.

Number of respondents who replied "probably yes" or "definitely yes" to HCAHPS Question 19, "Would you recommend this hospital to your friends and family?"

931

Total number of respondents to HCAHPS Question 19

971

Percentage of total respondents who responded "probably yes" or "definitely yes" to HCAHPS Question 19

95.9

Total number of people surveyed on HCAHPS Question 19

4722

Response rate, or the percentage of people who responded to HCAHPS Question 19

20.6

Table 3. Patient recommends hospital by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

<b>Race and/or Ethnicity</b>	<b>Number of "probably yes" or "definitely yes" responses</b>	<b>Total number of responses</b>	<b>Percent of "probably yes" or "definitely yes" responses (%)</b>	<b>Total number of patients surveyed</b>	<b>Response rate of patients surveyed (%)</b>

## **Patient Received Information in Writing**

The second HCAHPS quality measure is the percentage of patients who reported receiving information in writing on symptoms and health problems to look out for after leaving the hospital. General acute care hospitals are required to provide the percentage of patient respondents who responded "yes" to being provided written information, the percentage of the people who responded to the survey (i.e., the response rate), and the inputs for these percentages. These percentages and inputs are stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding HCAHPS question number is 17.

Number of respondents who replied "yes" to HCAHPS Question 17, "During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the

hospital?"

842

Total number of respondents to HCAHPS Question 17

971

Percentage of respondents who responded "yes" to HCAHPS Question 17

86.7

Total number of people surveyed on HCAHPS Question 17

4722

Response rate, or the percentage of people who responded to HCAHPS Question 17

20.6

## Agency for Healthcare Research and Quality (AHRQ) Indicators

General acute care hospitals are required to report on two indicators from the Agency for Healthcare Research and Quality (AHRQ). For general information about AHRQ indicators, please visit the following link by copying and pasting the URL into your web browser:

<https://qualityindicators.ahrq.gov/>

### Pneumonia Mortality Rate

The Pneumonia Mortality Rate is defined as the rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission for patients ages 18 years and older. General acute care hospitals report the Pneumonia Mortality Rate by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Inpatient Quality Indicator is 20. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

[https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI\\_20\\_Pneumonia\\_Mortality\\_Rate.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_20_Pneumonia_Mortality_Rate.pdf)

Number of in-hospital deaths with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

25

Total number of hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

441

Rate of in-hospital deaths per 1,000 hospital discharges with a principal diagnosis of pneumonia or a principal diagnosis of sepsis with a secondary diagnosis of pneumonia present on admission

56.7

## Death Rate among Surgical Inpatients with Serious Treatable Complications

The Death Rate among Surgical Inpatients with Serious Treatable Complications is defined as the rate of in-hospital deaths per 1,000 surgical discharges among patients ages 18-89 years old or obstetric patients with serious treatable complications. General acute care hospitals report this measure by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The corresponding AHRQ Patient Safety Indicator is 04. For more information about this indicator, please visit the following link by copying and pasting the URL into your web browser:

[https://qualityindicators.ahrq.gov/Downloads/Modules/PSI/V2023/TechSpecs/PSI\\_04\\_Death\\_Rate\\_among\\_Surgical\\_Inpatients\\_with\\_Serious\\_Treatable\\_Complications.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/PSI/V2023/TechSpecs/PSI_04_Death_Rate_among_Surgical_Inpatients_with_Serious_Treatable_Complications.pdf)

Number of in-hospital deaths among patients aged 18-89 years old or obstetric patients with serious treatable complications

## **California Maternal Quality Care Collaborative (CMQCC) Core Quality Measures**

There are three core quality maternal measures adopted from the California Maternal Quality Care Collaborative (CMQCC).

### **CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate**

The CMQCC Nulliparous, Term, Singleton, Vertex (NTSV) Cesarean Birth Rate is defined as nulliparous women with a term (at least 37 weeks gestation), singleton baby in a vertex position delivered by cesarean birth. General acute care hospitals report the NTSV Cesarean Birth Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information, please visit the following link by copying and pasting the URL into your web browser:

<https://www.cmqcc.org/quality-improvement-toolkits/supporting-vaginal-birth/ntsv-cesarean-birth-measure-specifications>

## **CMQCC Vaginal Birth After Cesarean (VBAC) Rate**

The CMQCC Vaginal Birth After Cesarean (VBAC) Rate is defined as vaginal births per 1,000 deliveries by patients with previous Cesarean deliveries. General acute care hospitals report the VBAC Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The VBAC Rate uses the specifications of AHRQ Inpatient Quality Indicator 22. For more information, please visit the following link by copying and pasting the URL into your web browser:

[https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI\\_22\\_Vaginal\\_Birth\\_After\\_Cesarean\\_\(VBAC\)\\_Delivery\\_Rate\\_Uncomplicated.pdf](https://qualityindicators.ahrq.gov/Downloads/Modules/IQI/V2023/TechSpecs/IQI_22_Vaginal_Birth_After_Cesarean_(VBAC)_Delivery_Rate_Uncomplicated.pdf)

Number of vaginal delivery among cases with previous Cesarean delivery that meet the inclusion and exclusion criteria

45

Total number of birth discharges with previous Cesarean delivery that meet the inclusion and exclusion criteria

## Rate of vaginal delivery per 1,000 deliveries by patients with previous Cesarean deliveries

## CMQCC Exclusive Breast Milk Feeding Rate

The CMQCC Exclusive Breast Milk Feeding Rate is defined as the newborns per 100 who reached at least 37 weeks of gestation (or 3000g if gestational age is missing) who received breast milk

exclusively during their stay at the hospital. Other criteria are that the newborns did not go to the neonatal intensive care unit (NICU), transfer, or die, did not reflect multiple gestation, and did not have codes for parenteral nutrition or galactosemia. General acute care hospitals report the Exclusive Breast Milk Feeding Rate by race and/or ethnicity, maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. The CMQCC Exclusive Breast Milk Feeding Rate uses the Joint Commission National Quality Measure PC-05. For more information, please visit the following link by copying and pasting the URL into your web browser: <https://manual.jointcommission.org/releases/TJC2024B/MIF0170.html>

Number of newborn cases that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

387

Total number of newborn cases born in the hospital that meet the inclusion and exclusion criteria

600

Rate of newborn cases per 100 that were exclusively fed breast milk during their hospital stay and meet the inclusion and exclusion criteria

64.5

## **HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate**

General acute care hospitals are required to report several HCAI All-Cause Unplanned 30-Day Hospital Readmission Rates, which are broadly defined as the percentage of hospital-level, unplanned, all-cause readmissions after admission for eligible conditions within 30 days of hospital discharge for patients aged 18 years and older. These rates are first stratified based on any eligible condition, mental health disorders, substance use disorders, co-occurring disorders, and no behavioral health diagnosis. Then, each condition-stratified hospital readmission rate is further stratified by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity. For more information on the HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, please visit the following link by copying and pasting the URL into your web browser:

[https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions\\_ADA.pdf](https://hcai.ca.gov/wp-content/uploads/2024/10/HCAI-All-Cause-Readmission-Rate-Exclusions_ADA.pdf)

## **HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate – Any Eligible Condition**

Number of inpatient hospital admissions which occurs within 30 days of the discharge date of an eligible index admission and were 18 years or older at time of admission

968

Total number of patients who were admitted to the general acute care hospital and were 18 years or older at time of admission

9425

Rate of hospital-level, unplanned, all-cause readmissions after admission for any eligible condition within 30 days of hospital discharge for patients aged 18 and older

10.3

Table 10. HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate for any eligible condition by race and/or ethnicity, non-maternal age categories, sex, payer type, preferred language, disability status, sexual orientation, and gender identity.

## Health Equity Plan

All general acute care hospitals report a health equity plan that identifies the top 10 disparities and a written plan to address them.

## Top 10 Disparities

Disparities for each hospital equity measure are identified by comparing the rate ratios by stratification groups. Rate ratios are calculated differently for measures with preferred low rates and those with preferred high rates. Rate ratios are calculated after applying the California Health and Human Services Agency's "Data De-Identification Guidelines (DDG)," dated September 23, 2016.

Table 15. Top 10 disparities and their rate ratio values.

Measures	Stratifications	Stratification Group	Stratification Rate	Reference Group	Reference Rate	Rate Ratio
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (No Behavioral Health Diagnosis)	Age (excluding maternal measures)			18 to 34	3.4	3.3
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (No Behavioral Health Diagnosis)	Age (excluding maternal measures)			18 to 34	3.4	3
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Race and/or Ethnicity			Asian	7.6	2.9
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Race and/or Ethnicity			Asian	7.6	2.9
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (No Behavioral Health Diagnosis)	Expected Payor			Private	4.6	2.6
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (No Behavioral Health Diagnosis)	Race and/or Ethnicity			Hispanic or Latino	7.2	2.6
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Race and/or Ethnicity			Asian	7.6	2.5
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Age (excluding maternal measures)			18 to 34	5.3	2.5
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate, stratified by behavioral health diagnosis (No Behavioral Health Diagnosis)	Race and/or Ethnicity			Hispanic or Latino	7.2	2.4
HCAI All-Cause Unplanned 30-Day Hospital Readmission Rate	Age (excluding maternal measures)			18 to 34	5.3	2.3

#### Plan to address disparities identified in the data

Community Memorial Healthcare recognizes that all of the disparities reflected in our data — including race, ethnicity, age, and payor type - are closely tied to the demographics of our service area. While we cannot control the underlying community demographics, we can address the way these factors influence health outcomes by focusing on equitable access and treatment by implementing focused strategies that lessen their impact and advance equity in care delivery. The overall goal of reducing readmissions by 10% has been identified as one of the main strategies for better patient outcomes. Patients are assessed for risk of readmissions and followed by case managers when moderate to high risk is identified. The Community Memorial Case Management department is collaborating with a transitional care management program for Medicare patients discharged to home, which involves initial contact within 48 hours, and 30-day follow up for medication reconciliation and support. Patients also receive post-discharge care through our Transition Care Management program at our Community Memorial Health Centers. ☐

☐  
Community Memorial Hospital — Ventura and Community Memorial Hospital — Ojai both

received Geriatric Emergency Department Accreditation by ACEP in 2025. This accreditation is awarded to organizations who demonstrate their commitment to adopting best practices for older adults in the emergency department and provide the best care possible for the community's older adults.

## Performance in the priority area

General acute care hospitals are required to provide hospital equity plans that address the top 10 disparities by identifying population impact and providing measurable objectives and specific timeframes. For each disparity, hospital equity plans will address performance across priority areas: person-centered care, patient safety, addressing patient social drivers of health, effective treatment, care coordination, and access to care.

### Person-centered care

Our hospital prioritizes person-centered care through multiple initiatives that demonstrate our organizational commitment to placing patients and families at the center of decision-making while continuously improving the care environment.

• Patient and Family Advisory Council (PFAC) consist of patients and families in our community by sharing health system related experiences and engaging in the process of quality improvement projects

• Dignity Memorial's Wise & Well podcast and digital newsletter series offers free wellness and preventative care education content to the community.

• Dignity Memorial partners with other community organizations to provide specific programs that address salient needs in our community. These collaborative programs include Teen Self-Esteem Enhancement Program, Family Wellness Workshops, and LiveStrong at the Ventura Family YMCA

• WæPw Parent Resource Center provides virtual and in-person classes on variety of topics, including childbirth preparation, infant care, breastfeeding support, and ongoing postpartum support.

### Patient safety

Patient safety is central to our mission. Key efforts include:

• Patient Safety and Quality Committee that meets regularly to review safety metrics, process improvements, and program updates to ensure the organization's commitment to safe patient care and evidence-based practices continue to take priorities. Our outcomes consistently reflect strong performance with safety events closely monitored and addressed to protect patients and foster safety and trust in care they receive.

### Addressing patient social drivers of health

We actively screen and assess patients for social determinants of health at time of admission to our facilities. This process helps us identify barriers to care and provides us with an opportunity to share information related to community resources and/or engage our social services to support with promoting better care and outcomes.

## Performance in the priority area continued

Performance across all of the following priority areas.

### Effective treatment

Effective treatment is achieved by delivering evidence-based and equitable care by following best

practice guidelines and standardized care protocols to ensure consistent high-quality treatment. Our care teams collaborate through daily rounds to tailor treatment plans to individual patient needs.

#### Care coordination

Care coordination is supported by strong provider engagement and structured process such as case management, social services, language translation, and if needed palliative care.

#### Access to care

Our hospitals are committed to serving all members of the community without financial or insurance-based barriers. Patients can access and receive care through our Emergency Department regardless of insurance status or ability to pay. Patients who require admission to hospital for inpatient care are admitted and cared for, even if uninsured. We offer charity care programs to support vulnerable populations. These practices reflect our mission to ensure equitable access and to remain a trusted provider for the community.

### **Methodology Guidelines**

Did the hospital follow the methodology in the Measures Submission Guide? (Y/N)
